BICYCLING AND GILROY

In Gilroy, we have a bicycle-friendly community where cyclists, pedestrians and motorists thrive. With proper equipment and a knowledge of the rules of the road, bicycling is a safe form of recreation and transportation. A cycling perspective is an important part of the City's decision-making process. This ensures proper sensitivity to bicycle and pedestrian issues in the design and implementation of relevant public works projects. We also educate citizens on the benefits of safe cycling, the City’s cycling-related resources, and pedestrian/motorist/cyclist etiquette and regulations.

Safe and convenient bicycle routes throughout the City, including appropriate connections to neighboring cities are shown on this map. Help us facilitate and continue the development and maintenance of cycling facilities and resources throughout the City by familiarizing yourself with this map and safety information.

Before a ride, always check your equipment: tires should be properly inflated, brakes tested, shifting crisp, seat height comfortable and efficient and broken spokes should be fixed. Besides being prepared with ample food and fluids, provide for contingencies: clothes for a change in weather (especially a windbreaker) and spare tire.

Enjoy the Ride!
