## Planning

**Note:** Footnote <sup>(A)</sup> identifies that certain fees and charges will be subject to increase upon the city's receipt of expenditure authorization from the state for the city's High Speed Rail Master Plan effort. The increased fee shall not apply to planning fees collected for other agencies, planning fees collected for payment of attorney services, planning fees collected for direct publishing costs, or planning fees collected for purposes of paying non-City consultants for their work in establishing compliance with the California Environmental Quality Act. See Council Resolution 2014-14.

**Reimbursements**

The Half Pipe schedule is used to determine the front footage reimbursement to former developers for infrastructure previously installed along the front footage of the development.

The Full Pipe schedule is used to determine the oversizing reimbursement to the developer for installing water, sewer, and storm main extensions to sizes required by each master plan that are greater than the sizes required by the development. The oversized portion is the difference between the master planned size for the main and the greater of the main size required by the development or the developer’s minimum responsibility for each main.
