**CITY OF GILROY
PERSONNEL COMMISSION
STAFF REPORT**

Date: June 13, 2022

To: Personnel Commission

Staff: LeeAnn McPhillips, Administrative Services & Human Resources Director/Risk Manager

Subject: Review and Approve Job Description and Salary Range for the Position of Geographic Information Systems (GIS) Analyst

SUMMARY:

In the recent past, Geographic Information Systems (GIS) duties were shared amongst departments and one Planner took the lead on GIS tasks and responsibilities. Given the new Land Management System and the continued shift to online services, it was determined that the city needed a more dedicated GIS employee. The City works closely with the County of Santa Clara to ensure the most current data is contained within the layers of the GIS system. Based on this need, once this position is filled, the Planner will focus on Planning duties, as the City will have an employee dedicated to an extensive range GIS duties. The GIS position is approved in the budget.

In addition, staff in the main departments that use GIS evaluated the situation and it was determined that this city-wide GIS position will be placed in the Information Technology (IT) Division of the Administrative Services Department. This will allow the employee to interface closely with IT staff and provide internal services to all city departments that rely on GIS data.

As such, a new job description for Geographic Information Systems was created and a copy is attached for the Personnel Commission's review. Based on the analysis of job duties and role within the organization, this position was best matched with other similar GIS position under the job title of Geographic Information Systems (GIS) Analyst. As with other similar analyst and technology position, this position has been categorized as an exempt position falling under the Gilroy Management Association employee group.

Looking at both market data and other analyst positions within the organization, the exempt salary range of \$82,764 - \$110,364 has been identified for this new position.

Since this full-time classification will be included with the Gilroy Management Association employee group, the Gilroy Management Association reviewed the revised job description and proposed salary range and agreed with the edits and placement.

RECOMMENDED ACTIONS:

Staff recommends that the Personnel Commission take the following action:

1. Approve the job description for the position of Geographic Information Systems (GIS) Analyst.
2. Approve the Gilroy Management Association salary range of \$82,764 - \$110,364 for the GIS Analyst classification.

Respectfully Submitted,

LeeAnn McPhillips

Administrative Services & Human Resources Director/Risk Manager

**ADMINISTRATIVE SERVICES DEPARTMENT
INFORMATION TECHNOLOGY DIVISION
GIS ANALYST**

GENERAL DUTIES: This is a journey-level, exempt position in which the incumbent works independently, or as part of a team, on professional level work involving significant analytical and technical ability. Under the general supervision of the Information Technology Manager, coordinates the management of the City's Enterprise GIS platforms including ArcGIS Online, ArcGIS Portal, ArcGIS Server, and enterprise geodatabases in support of various City departments and functions including utilities; oversees updates and maintenance of the City's GIS database, and coordinates with other Departments and the City's GIS service provider in the creation of maps and GIS layers.

Performs a wide variety of advanced business process, analysis and coordination functions to implement and maintain the integration and functionality of an enterprise Geographic Information System (GIS). Provides technical consultation, and business solutions to departments and workgroups throughout the City. May develops and design databases, scripts and applications.

Provides management, quality control, delivery and utilization of GIS information services. Performs a variety of advanced analytical and geo-processing functions to create, maintain, and retrieve data from the City's GIS. Develops and monitors GIS data quality control and update requirements to ensure proper data integration with other business systems. Develops and maintains data standards and procedures. Coordinates and reviews GIS data collection and mapping processes, and conducts training

Work is characterized by the incumbent's leading role in both technical and business-based support of GIS in a complex enterprise environment. Includes negotiation of contracts, coordination with business system vendors relying on GIS for implementation, integration and training, assisting users in developing systems and/or specifying changes, writing and/or specifying conversions.

GENERAL REQUIREMENTS:

Personal Appearance - Is appropriate for the work environment and meets expectations for the proper image of the city, as per department policy.

Attendance - Follows department/City policy in regard to punctuality and attendance.

Compliance with Work Instructions - Follows all work instructions given and completes all assigned duties. Follows the policies, rules, and regulations of the City and department.

Safety - Follows the safety and Health Handbook, as well as other safety-related standards, and avoids unnecessary risk to oneself, co-workers, citizens, and property.

Internal Relations - Conducts work in a manner which supports the overall team effort, and which avoids disruption on one's work and the work of others. Treats all City employees with respect. Takes responsibility to resolve differences. Finds solutions to problems. Respects racial, religious, ethnic, and gender identity differences of others, and avoids derogatory statements regarding these differences.

Customer Service - Conducts work that fosters public support for the City, that will lead to fewer complaints and claims against the City. Treats customers with respect. Follows the same rules that one expects the customers to follow. Respects racial, religious, ethnic, and gender identity differences of others, and avoids derogatory statements regarding these differences.

ILLUSTRATIVE EXAMPLES OF WORK:

1. Designs, develops and manages the administration of the City's Intranet/Internet GIS mapping and data publishing applications (Esri Platform, Geocortex platform, custom applications). May administer the cartographic design of and delivery of mapping feature services for ArcGIS Server and other integrated business systems according to industry best practices. Manages and streamlines update processes and administers business integration requirements for ArcServer based tools.
2. Provides high quality, detailed consultation, technical support and troubleshooting for key City GIS-related applications, including working with vendors. Evaluates current procedures, workflows, and problems, and recommends changes and improvements. Trains and supports City staff in the use and applications of GIS data viewing software and associated information, including a wide range of technical and non-technical employees using the GIS to perform analysis, complete inventories, and compile reports and studies.
3. May develops and update data models, scripts, interfaces and programs in support of importing/exporting and manipulation of GIS data between various software systems and/or business applications. May writes scripts that automate daily or weekly processes to maintain the integrity of the GIS data. Receives feedback from users, tests, troubleshoots, and repairs scripts as necessary.
4. Designs and develops GIS and related application procedures, standards and programs as required; tests procedures and programs to ensure that desired results are achieved; makes necessary changes to correct deficiencies. Researches and provides recommendations on application development software, add-ins and components. May use scripting and markup languages as needed to automate tasks.
5. Develops and maintains workflows and reports (example: Land Parcel Report), that automate/guide users through processes and generate reports that integrate data from GIS and City business systems, using ESRI, Geocortex, and SQL Server tools.
6. Coordinates GIS system updates and configurations settings to ensure optimum system performance and security. Administers the GIS and associated software and systems licensing to ensure proper and efficient deployment, accessibility and license utilization. Monitors system performance and logs to troubleshoot and proactively adjusts or recommends adjustment of configuration settings to maximize GIS system performance, availability, and security.
7. Acts as project lead for implementing business and analytical support to business system integration with the GIS systems. As project leader, chairs meetings and/or committees, prepares agendas, and coordinates project activities, including negotiation of contracts and coordination with business system vendors relying on GIS for implementation. Communicates project recommendations and/or status to management at all levels of the organization. Identifies key business requirements, writes and produces GIS business functional specifications and workflow to meet the needs of the new business process or system. May provide explanation of research, determinations, analysis methods and deliverable materials in private and public meetings.
8. Coordinates and provides support for special mapping and data analysis projects and services for other City departments, outside agencies, the public, private developers, and consultants.
9. May participate in the development of GIS mapping, presentation and data collection standards as a technical and business resource to ensure uniformity and compatibility in the city GIS mapping system. May coordinate and perform research, data collection and data entry for the creation and maintenance of GIS data.

10. Work with contractors and City staff in multiple departments to coordinate GIS needs, maximize functionality and efficiencies of the City's Land Management System, Public Works Asset Management System and reduce duplication of data.
11. Perform other related work as required.

**CITY OF GILROY
PERSONNEL COMMISSION
STAFF REPORT**

Date: June 13, 2022

To: Personnel Commission

Staff: LeeAnn McPhillips, Administrative Services & Human Resource Director/Risk Manager

Subject: Abolish the Eligibility List for the position of Maintenance Worker I

SUMMARY:

In December, 2021, Human Resources completed a recruitment for the position of Maintenance Worker I. Fourteen candidates were certified to the list – one on the Outstanding Band and thirteen on the Satisfactory Band. The Outstanding Band candidate was hired and six candidates from the Satisfactory Band have been hired. In addition, one candidate withdrew/stopped responding and four candidates were identified as not a good long-term fit based on the interview process and/or prior employment information.

At this time, the Public Works Department believes they have pursued and hired the best candidates from this list and are requesting a new recruitment to identify high quality candidates for the two current vacancies that need to be filled. The seven top candidates were hired from the list making for a very successful recruitment process.

In accordance with the Human Resources Rules and Regulations, upon approval of the Personnel Commission, a list may be declared exhausted at any time upon written statement with supporting reasons from the department.

For the reasons stated above, and as allowed by the Human Resources Rules and Regulations, staff recommends that the Personnel Commission abolish the December, 2021 eligibility list for the classification of Maintenance Worker I. A new recruitment will commence right away.

RECOMMENDED ACTION:

For the reasons stated above, and as allowed by the Human Resources Rules and Regulations, staff recommends that the Personnel Commission abolish the December, 2021 eligibility list for the classification of Maintenance Worker I.

Respectfully Submitted,

LeeAnn McPhillips
