DESCRIPTION
7a. Architectural style: California Bungalow
7b. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

358 W. Second Street has medium double gables with latticework in the larger one. This house typifies the California style of craftsman bungalow with the exposed eaves, stucco walls and elephantine columns supporting the veranda porch. The plain craftsman usually has wood siding and columns that aren't elephantine. The residence is single storied and the building is constructed on a rectangular floor plan. A distinctive feature is the unique vertical board design under the main facade gable. This feature is found in a number of craftsman bungalows and plain bungalows found in the city. It is no doubt a builder's signature and, as such, defines a special collection of buildings.
